Lindsay Expands Amarillo, Texas, Warehouse to Support More Customers and Products

(OMAHA, Neb.) – August 2013 – Lindsay Corporation, an international irrigation leader, announces a new warehouse in Amarillo, Texas.

The facility, located at 8948 CenterPort Blvd., offers technical aftermarket support and parts distribution. It also provides mechanized irrigation repair parts as well as pump, telematics and ancillary irrigation equipment.

With a growing market in the southwest United States, Lindsay needed to expand its existing warehouse facility to support more customers and products.

Lindsay partnered with PRANA Development Group to build a new 22,000-square-foot facility that includes an office and distribution center. The facility is 30 percent larger than the previous warehouse and will allow Lindsay to expand their current inventory, as well as grow into new product lines.

“The relocation of our distribution operations to this new facility will greatly improve our customer service and ability to serve a growing market,” says Clint Babcock, Texas Distribution Center Manager at Lindsay.

Babcock says Lindsay decided to expand in the Amarillo area because of its central location to a strong and important irrigation market and accessibility to highways and other logistical accommodations.

“The convenient location of our new state-of-the-art facility allows for easier access from all entry points into the city of Amarillo, as well as better access to our distribution centers,” says Babcock.

The new Lindsay warehouse serves the southwest United States, including Texas, Oklahoma, Kansas, New Mexico and Arizona.

“As our dealer and customer base grows, this new facility provides us with the room both to meet our current needs and to grow in the future,” says Rick Provaznik, Lindsay

Director of Aftermarket Sales and Support. “We look forward to continue serving the agricultural irrigation needs of farmers throughout Amarillo and surrounding areas.”

Provaznik says the new warehouse will enhance Lindsay services by offering a faster turnaround for parts and repairs, as well as additional offerings to dealers.
