

Contract Manufacturing

Raw material to finished product in a single Nebraska facility.

SERVICES

- + ERW Steel Tubing
- + Hot-Dip Galvanization
- + Fabrication
- + Welding
- + Sourcing (Material)
- + Painting
- + Kitting / Assembly
- + Quality Control & Documentation
- + Packaging / Shipping & Transportation

WHO WE SERVE

We partner with manufacturers across industries that demand strength, longevity, and consistent performance:

- + Ag Machinery & Equipment
- + Construction & Infrastructure
- + Energy & Utilities
- + Heavy Equipment & Off-Highway
- + Transportation & Logistics
- + Industrial OEM Components
- + Data Center Infrastructure

Contract Manufacturing

STEEL TUBING, METAL FABRICATION,
HOT-DIP GALVANIZATION & MORE

Our contract manufacturing services & capabilities.

- + ERW Steel Tubing (Round; 4-10" OD; up to .250" wall thickness)
- + Hot-Dip Galvanization (Batch)
- + Fabrication (Cutting: saw, laser, plasma, punching, bending)
- + Welding (Manual & Robotic)
- + Sourcing (Material)
- + Painting
- + Kitting / Assembly
- + Quality Control & Documentation
- + Packaging / Shipping & Transportation

Raw material to finished product in a single Nebraska facility, including our own state-of-the-art tube mills and galvanizing facilities. *One supplier, one quality trail, and no inter-vendor freight.*

The Lindsay Advantage

- + *Speed, quality and reliability - one trusted source*
- + Reduced supply chain risk, complexity & vendor management
- + Improved communication & accountability
- + Robust quality systems & documentation
- + Dedicated support from quote to shipment + turnkey delivery
- + Scalable production capabilities for growing OEM programs
- + Decades of agriculture & infrastructure manufacturing experience

Let's build what's next.

Built for scale. Proven for performance. Trusted to deliver.

When your products operate outdoors, under load, and in mission critical environments, manufacturing quality isn't optional - it's essential.

Lindsay delivers industry-leading steel tubing, fabrication, hot dip galvanization and more from a single, accountable source. With fast quoting, easy ordering, confident quality, and clear visibility from quote to shipment, we create an exceptional end-to-end customer experience - and the confidence to scale without compromise.

The scale, engineering depth and manufacturing reputation of an established Nebraska OEM (Zimmatic irrigation / infrastructure heritage) stand behind our contract work. The Lindsay, NE facility has been manufacturing since 1955 - roughly 70 years of production experience at a single location. Since 2023, Lindsay has made significant capital investments in new Industry 4.0 production equipment and digital technology systems to advance manufacturing capacity and capabilities in core processes.

By combining critical processes under one roof, we reduce handoffs, eliminate delays, and simplify your supplier base - without sacrificing quality or control.
