AlphaGuard™

Longitudinal Channelizing Device and Temporary Barricade

+ Lightweight
+ UV & impact-resistant

+ Quick fill & drain for rapid deployment

+ Forklift-ready for easy handling

////////////////////////

FEATURES

+ Lightweight for efficient transport

+ Compatible with standard fence panels with a light pocket for mounting common lights

+ Made with UV- and impact-resistant MDPE (Medium Density Polyethylene) for long-lasting durability

+ Forklift-compatible for easy loading and unloading

+ Multiple fill ports and drain plugs on either side, fast setup and removal

+ Reusable and cost-effective for repeated use

+ Standard white and orange, other colors optional

Physical Specifications

	32" Model
Length	72"
Width	24"
Height	32"
Weight (Empty)	~78lbs

The AlphaGuard Longitudinal Channelizing Device (LCD)

The AlphaGuard™ Channelizing Device is a next-generation solution for temporary safety and perimeter control. Designed for speed, strength, and adaptability, AlphaGuard is ideal for directly the flow of traffic in construction zones, pedestrian walkways, airports, outdoor dining areas, and more.

Made from UV- and impact-resistant MDPE (Medium Density Polyethylene), AlphaGuard is lightweight when empty and easily fillable with water or sand for stability. Its modular design includes interlocking ends for secure setups and forklift-ready features for effortless transport. Multiple fill and drain ports ensure quick deployment and removal, making AlphaGuard perfect for both short-term and long-term applications.

**Lightweight. Durable.
Built for rapid deployment.**

? Frequently Asked Questions

What makes AlphaGuard different from traditional barriers?
AlphaGuard is lightweight when empty, stackable for efficient transport, and easily fillable with water or sand for stability. It's reusable, UV- and impact-resistant, and designed for rapid deployment.

How easy is AlphaGuard to set up and remove?
Very easy. Each unit includes multiple fill and drain ports for quick ballast changes and is forklift-compatible for fast loading and unloading, and can easily be moved by one person.

What are the dimensions?
The dimensions of AlphaGuard are:

- 32" H × 24" W × 72" L, ~78 lbs empty

Can AlphaGuard withstand harsh conditions?
Yes. It's built from UV- and impact-resistant MDPE (Medium Density Polyethylene), including antifreeze solutions to prevent freezing, making it durable for outdoor use in all weather conditions.

Is AlphaGuard cost-effective?
Absolutely. AlphaGuard is reusable and built to last, reducing long-term costs compared to single-use or heavy concrete barriers.

How does AlphaGuard improve logistics and storage?
AlphaGuard is lightweight when empty, allowing for efficient transport and storage. This reduces freight costs and makes it easier to manage large quantities for big projects or emergency deployments.
