

# DR-46

## Motorcycle Barrier Attenuator

- + Significantly reduces injuries & fatalities to motorcyclists
- + Allows for a curve radius as low as 50' (15 m)
- + Ideal for context-sensitive design applications

### FEATURES

- + Significantly reduces injuries and fatalities to motorcyclists
- + Attenuator absorbs energy and redirects the impacting motorcyclist by preventing the motorcyclist from impacting guardrail posts
- + Bright yellow color acts as a warning to all motorists
- + Allows for a curve radius as low as 50' (15 m)
- + Ideal for context-sensitive design applications

## Physical Specifications

| Classification | Motorcycle Barrier Attenuator |        |
|----------------|-------------------------------|--------|
| Module Length  | 9' 10"                        | 3 m    |
| Width          | 8.5"                          | 215 mm |
| Height         | 13"                           | 330 mm |

### Designed to Make Guardrail Safer for Motorcyclists

The DR-46 Motorcycle Barrier Attenuator (MBA) is designed to attach to standard roadside guardrail to protect errant motorcyclists from the guardrail post during a fall or collision. The use of DR-46 MBA under guardrail reduces the risk of the motorcyclist impacting dangerous guardrail posts. The DR-46 MBA is easy to install with a simple connection to existing guardrail posts. It can greatly decrease the injury and fatality rates of motorcycle guardrail accidents without interfering with guardrail performance. The DR-46 Motorcycle Barrier Attenuator is a physically flexible system that can follow radius curves as low as 50' (15 m).

### Frequently asked questions

#### How long does it take to install the DR-46 Motorcycle Barrier?

An experienced four-person crew with the proper tools should be able to install 328' (100 m) of DR-46 MBA modules in 15 minutes.

#### Can the DR-46 MBA be used on curves?

Yes, the DR-46 MBA can be installed on curves with a radius as low as 50' (15 m).

#### What type of safety barriers can the DR-46 MBA be attached to?

The DR-46 MBA easily attaches to most popular shapes and heights, with or without blockouts of NCHRP 350, MASH and EN1317-approved steel guardrail.

#### Does the DR-46 MBA affect the performance of the guardrail?

No - when properly installed, the DR-46 MBA does not affect performance of guardrail.
