

We're watching out for your:

TOWERWATCH™ PREMIER TOWER
ALIGNMENT MONITOR

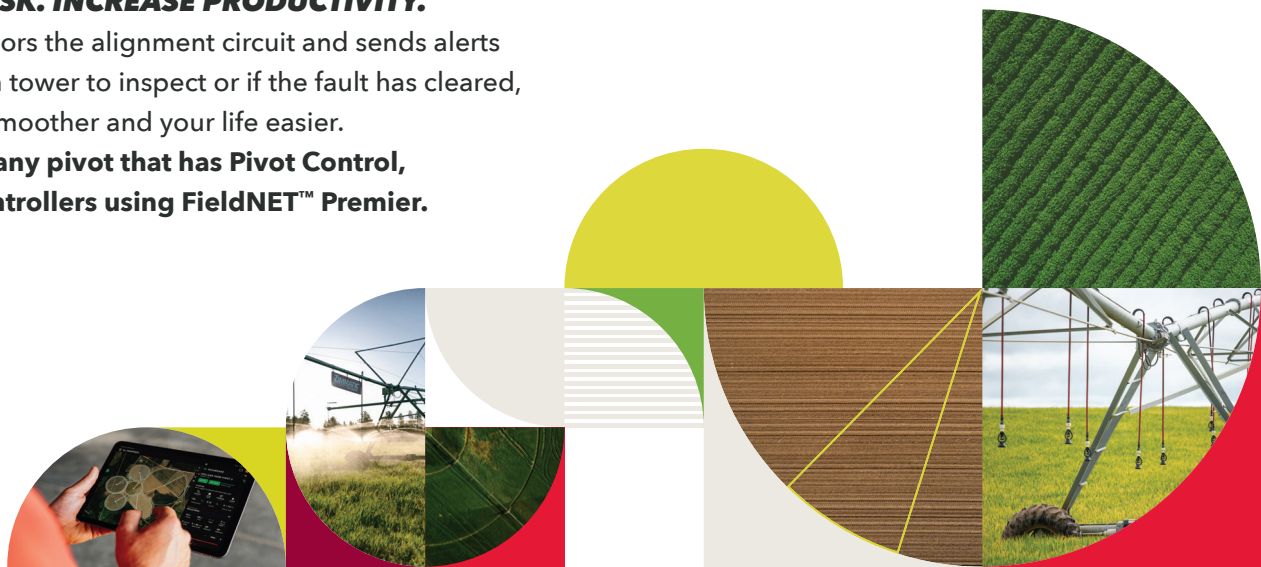

Clear faults faster with pinpoint tower notifications.

Identify a faulted tower instantly without spending countless hours walking the system with TowerWatch™, part of Lindsay's innovative SmartPivot™ Solutions. TowerWatch tells you which tower faulted so you can plan better to clear the fault faster.

LOWER CROP RISK. INCREASE PRODUCTIVITY.

TowerWatch monitors the alignment circuit and sends alerts so you know which tower to inspect or if the fault has cleared, making your day smoother and your life easier.

Compatible with any pivot that has Pivot Control, 700C or 712C controllers using FieldNET™ Premier.

Make work—and life—easier with TowerWatch.

Get instant notifications

Pinpoint tower faults immediately

Lower risk to your crop

Plan better to arrive quickly

Minimize time walking the system

Make fewer trips to the field

Increase productivity by monitoring tower faults.
