

Metal Fabrication Services

Production-ready components and assemblies from a single manufacturing partner.

WHO WE SERVE

We partner with manufacturers across industries that demand strength, longevity, and consistent performance:

- + Ag Machinery & Equipment
- + Construction & Infrastructure
- + Energy & Utilities
- + Heavy Equipment & Off-Highway
- + Transportation & Logistics
- + Industrial OEM Components
- + Data Center Infrastructure

STREAMLINED

SUPPLY CHAIN

FASTER, MORE EFFICIENT

PRODUCTION

CONSISTENT QUALITY

& REPEATABILITY

Metal Fabrication Services

Our fabrication services & capabilities.

Metal Fabrication

- + Precision cutting, forming and shaping of metal components
- + Creation of frames, brackets, supports and structural components
- + Custom fabrication tailored to OEM specifications
- + Integrated with welding, tubing and finishing services

Kitting Services

- + Consolidation of multiple components into organized, ready-to-use kits
- + Reduced assembly time and inventory management requirements
- + Improved part traceability and order accuracy
- + Simplified logistics and delivery coordination

Assembly Services

- + Mechanical and welded assembly of fabricated components
- + Production-ready subassemblies and finished assemblies
- + Consistent quality and repeatability for scalable manufacturing
- + Reduced labor requirements for OEM customers

The Lindsay Advantage

- + *Speed, quality and reliability - one trusted source*
- + Reduced supply chain complexity & vendor management
- + Improved communication & accountability
- + Robust quality systems & documentation
- + Dedicated support from quote to shipment
- + Scalable production capabilities for growing OEM programs
- + Decades of agriculture & infrastructure manufacturing experience

Let's build what's next.

From raw material to production-ready assemblies.

Lindsay's metal fabrication, kitting and assembly services help OEMs move beyond individual components to complete, production-ready solutions. Whether you need precision-cut parts, welded structures or packaged assemblies ready for installation, our integrated capabilities help simplify your supply chain and support scalable production.

01 Single-source manufacturing.

Eliminate supplier handoffs by consolidating fabrication, tubing, galvanizing and welding with one accountable manufacturing partner. Our integrated approach improves communication, streamlines production and reduces delays.

02 Production-ready solutions.

From individual components to fully fabricated assemblies, we support projects through every stage of production to help OEMs accelerate timelines and improve workflow efficiency.

03 Built for scalability.

Whether supporting low-volume projects or high-volume production programs, our fabrication capabilities are designed to deliver the consistency, repeatability and quality required for predictable output.

04 Manufacturing expertise you can trust.

As the company behind trusted agriculture and infrastructure solutions deployed worldwide, Lindsay understands what it takes to manufacture products for demanding, mission-critical applications.
