

**Zimmatic CD2000 Center Drive Motor**

***Durability and reliability  
that powers your savings.***

**ZIMMATIC™**

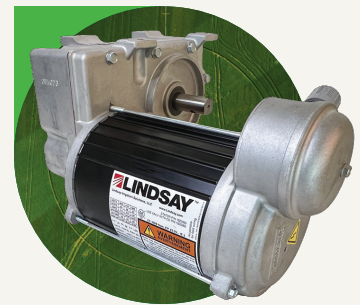

## ZIMMATIC CD2000 CENTER DRIVE MOTOR

# Reliable performance season after season

Designed for optimum durability, efficiency and speed; Lindsay pioneered the horizontal Center Drive, which has become the industry standard. It continues to routinely outperform the competition with more than 30 years of proven reliability.

- + Spur Gear Technology provides higher torque
- + Anodized aluminum stator and housing for longer life in harsh environments

| CD2000        | 43RPM                          | 59RPM                          |
|---------------|--------------------------------|--------------------------------|
| Dimensions    | 18.23 in X 12.32 in X 10.50 in | 19.50 in X 12.32 in X 10.50 in |
| Weight        | 46 lbs                         | 52.5 lbs                       |
| Output RPM    | 43/36 RPM                      | 59/48 RPM                      |
| Motor HP      | 0.75 HP                        | 1.00 HP                        |
| Gear Ratio    | 40:1                           | 30:1                           |
| Volts AC      | 460/380                        | 460/380                        |
| Frequency     | 60/50Hz                        | 60/50Hz                        |
| Full Load Amp | 1.4/1.5 A                      | 1.8/2.0 A                      |

### Benefits

|                    |   |
|--------------------|---|
| Torque             | Higher torque and enhanced performance in rugged terrain.   |
| Efficiency         | Maximum efficiency yielding lower operational costs.  |
| Weather Protection | Added protection in the junction box with O-Ring and single bolt uniform mounting. Added rain gutter with channel for direct spray protection and unrestricted water drainage from motor. |
| Corrosion          | Aluminum stator and housing for longer life in harsh environments.  |
| Performance        | Enhanced rotor and aluminum stator provides better air-gap and has proven field performance.  |
| Durability         | Powdered metal gears provide precision form, higher strength.   |
| Backdrive          | Designed to offer ample resistance to prevent coasting down hills.  |
