

Tempoline WR0204

Type II P5 Temporary Road Marking Tape

- + Easy to install and immediately driveable
- + Durable (minimum wear resistance up to traffic class P6)
- + BASt certified (Federal Highway Research Institute - Germany)

FEATURES

- + Self-adhesive, removable Type 2 P5 tape for short- and medium-term construction sites - applicable to nearly all pavement surfaces
- + Ensures optimal lane guidance through construction zones in all weather conditions
- + Pigmented without heavy metals
- + Meets the requirements of EN 1436 and EN 1790
- + Suitable for construction sites of short to medium duration

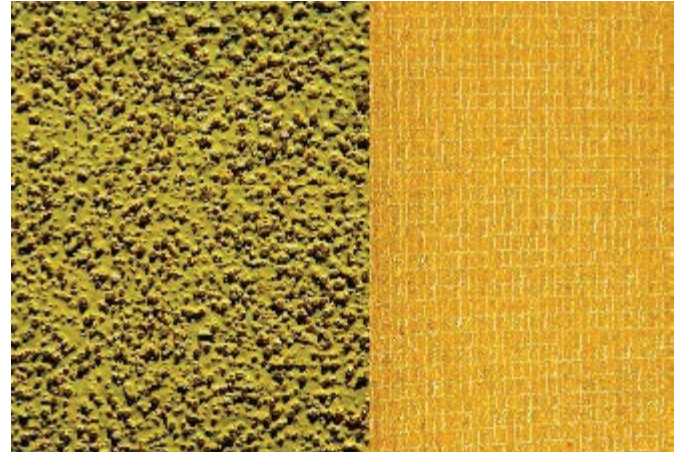

High-visibility markings made for work zones.

Fast to apply. Easy to remove. Built for safety.

Tempoline™ WR is a temporary road marking tape designed to deliver exceptional visibility and performance in construction zones, lane shifts, and other short-term traffic deviations. Whether you're applying lines or temporary symbols, Tempoline WR ensures clear guidance for drivers in all conditions—day, night, and wet weather—while allowing for clean, efficient removal once the work is done..
