**ZIMMATIC**<sup>®</sup>  
BY LINDSAY

TO GET THE  
MOST OUT  
OF YOUR FIELD,  
**PUT THE BEST  
TECHNOLOGY  
IN YOUR FIELD.**

Choose a new state-of-the-art  
Zimmatic control panel.

**Advanced controllers with unparalleled ease of use. Because every grower's situation is different.**

Next generation Zimmatic controllers lead the industry in technological sophistication and an intuitive user interface.

Smart Barrier Actions work with both hard and soft barriers and allow growers to independently control auto-stop and auto-reverse actions for part-circle applications.\* Over-the-air serviceability makes software and firmware updates and future feature enhancements easier than ever. You also get more end gun areas and management capabilities, including the enhanced ability to disable end guns remotely or in-field.

Every grower's situation is different. That's why we offer a range of advanced Zimmatic controllers, all FieldNET-ready and prepared to go to work in your field. Each offers the ability to take complete command of pivot irrigation operation. It's advanced technology that's easy to use. Available globally by the end of 2019.

\* The 500C Smart Barrier Actions are compatible with hard barriers only

## 500C

Our standard panel is anything but standard. The 500C comes FieldNET-ready, with basic run control and easy pump start. It's packed with new built-in features including pressure shutdown alert, pressure restart, and more.

## 700C

The same ultra-simple interface as the 500C, with GPS positioning and FieldNET-ready to remotely automate stops, provide advanced end gun control, create precision irrigation plans and much more. Compatible with FieldNET Advisor® for advanced irrigation scheduling.

## 712C

The top of the line, featuring an industry-leading intuitive 12" interactive touchscreen, familiar to anyone who uses a smart phone. Provides detailed status and full control in the field or remotely with FieldNET. It's everything the 700C offers plus an easy-to-use in-field touchscreen interface.
