

City Water Management - Smart Solution

The SentraLink systems provide monitoring of flow, level, and pressure, as well as manual or automated pump control in water management systems. The SentraLink devices communicate via a two-way web interface providing the user data and control using any web-enabled device.

Elecsys Connect Web Portal

Web interface providing user data and control using any web-enabled device.

1. Well

- Pump Control
- Pressure
- Flow Rate & Volume

2. Ground Storage

- Flow Rate
- Tank Level

3. Booster Station

- Pump Control
- Pressure
- Flow Rate & Volume

4. Storage Tank

- Pressure
- Flow Rate & Volume
- Tank Level

SentraLink LT

The compact, rugged and flexible SentraLink LT provides two-channels of analogue or digital monitoring and accommodates most common sensors (4-20mA, 0-5V, 0-10V).

SentraLink RC

Provides all of the monitoring capabilities as the SentraLink LT with the addition of two inputs for automatic or manual relay control.
