

City Wastewater Management - Smart Solution

SentraLink products economically monitor fluid flow, level, and pressure in wastewater-to-irrigation systems. The SentraLink RC model adds the ability to control pump on/off. SentraLink devices communicate via cell modem to feed user data and control using any web-enabled device.

Elecsys Connect Web Portal

The web interface provided to Elecsys customers enables user data and control using any web-enabled device.

1. Neighborhood Waste Mains

- Monitor waste level
- Monitor and control pump status

2. Lift Stations

- Monitor waste level, monitor and control pump status

3. Treatment Plants

- Monitor flow, volume level and turbidity
- Control pump status

4. Recycling/Disposal

- Monitor and control pump status
- Measure flow and volume

SentraLink LT

The compact, rugged and flexible SentraLink LT provides two-channels of analog or digital monitoring and accommodates most common sensors (4-20mA, 0-5V, 0-10V).

SentraLink RC

Provides all of the monitoring capabilities as the SentraLink LT with the addition of two inputs for automatic or manual relay control.
