

SENTRALINK SERIES

**KEEP
INFORMATION
FLOWING**

REMOTE MONITORING
& CONTROL FOR
FLUID SYSTEMS

KEY BENEFITS

- Real time insights to crucial water flow data
- Monitor municipal, industrial and agricultural water systems
- Wastewater level monitoring and pump control
- Remote control of pumps and lift stations
- Monitor corrosion rates
- Graphical and tabular data display options

“
KNOWING WHAT'S GOING ON WITH THE WATER SYSTEMS IS CRUCIAL TO KEEPING THE WHOLE OPERATION RUNNING SMOOTHLY.
”

MONITORING AND CONTROL SOLUTIONS FOR WATER AND FLUID MANAGEMENT SYSTEMS

The Elecsys SentraLink series gives you the power to remotely monitor and control fluid management systems from wherever you are, freeing personnel to focus on other tasks. View and control status, levels, flow, pressure and more for water and wastewater management systems all in a full-featured web portal using any web-enabled device.

Cost-effective communications fees, low initial costs, and long service life make the SentraLink series an ideal solution for city water supply and wastewater systems, as well as agricultural irrigation and livestock wastewater management.

Compact and rugged SentraLink LT hardware can acquire two channels of monitoring data from any common sensor or transducer, giving you a 24/7 eye on your system. The SentraLink RC adds remote control capabilities either manually or triggered by alarm status, ideal for even the most remote field applications. Continues operating even in the event of power failure.

Offering more channels and with faster sample rate capabilities, the SentraLink DR monitors up to four analog channels and two digital channels and features high speed sampling (250ms). Plus, it is also available in satellite and Modbus.

The Elecsys SentraLink series is an affordable answer to real-time management of fluid systems of any kind.

ELECSYS SENTRALINK SERIES

Key Features:

- Data inputs to Elecsys Connect dashboard by schedule or on demand
- 24/7/365 real-time monitoring and control
- Enhanced reporting functions

SENTRALINK SERIES

| Model | Data Recorder | 2-Channel Relay Control | Sample Rate | Sensor/ Transducer Channels | Communication | Lifetime Tech Support | Cloud-based Data |
|---------------|---------------|-------------------------|-------------|------------------------------------|---------------------------|-----------------------|------------------|
| SentraLink LT | ● | | | 2 digital or analog | cellular | ● | ● |
| SentraLink RC | ● | ● | | 2 digital or analog | cellular | ● | ● |
| SentraLink DR | ● | | ● | 4 fixed analog and 2 fixed digital | cellular/satellite/Modbus | ● | ● |
